9. Statement of Project Goals and Objectives: Reconstruction of several portions of roads 37-3-25 and 37-3-25.1 to allow large equipment to be hauled in by Low-Boy & Truck. These roads also need pitrun surfacing and additional culverts in some locations. Goal: To provide access for project work and emergency fire response.

10. Project Description: (Provide concise description of project and attach map.) Roads 37-3-25 and 25.1, access land managed by BLM, City of Jacksonville, Boise Cascade Corp. and Spaulding Timber. Reconstruction in several key locations will allow large equipment to be hauled in by truck and low-boy trailer. Currently, most equipment must be walked for several miles to logging and construction projects. Of particular concern is the response time of equipment needed to control an escaped fire.

The reconstruction of several tight corners and narrow and steep portions of road, would allow access of all equipment. Adding pitrun rock and several culverts will decrease erosion and extend wet weather access. Excess excavated material would be placed at locations on city property.

39. Monitoring Plan (Sec.203(b)(6))

- a. What measures or evaluations will be made to determine how well the proposed project meets the desired ecological conditions? [Sec. 203(b)(6)] Who will be responsible for this monitoring item?
- Prior to construction, surveys for the T&E species will be completed by the City of Jacksonville or other volunteers.
- b. How will the project be evaluated to determine how well the proposed project contributes towards local employment and/or training opportunities, including summer youth jobs programs such as the Youth Conservation Corps? [Sec. 203(b)(6)] Who will be responsible for this monitoring item?
- Project workforce and economic impact will be recorded.
 - The Oregon State University, Forestry Extension Agent uses the forests and infrastructure in Jackson Creek watershed for class work and landowner demonstrations.
- c. What methods and measures of evaluation will be established to determine how well the proposed project improves the use of, or added value to, any products removed from National Forest System lands consistent with the purposes of this Act? [Sec. 203(b)(6) and Sec. 204(e)(3)] Who will be responsible for this monitoring item?
- Project would increase the value products for all landowners by reducing the cost of access and extend the accessibility into the wet season.
- Project would benefit all landowners by allowing emergency access for large equipment for wildfire.
- d. Identify total funding needed to carry out specified monitoring tasks (Table 1, Item 33)

Amount: 500
